RESPONSE

Dear Sir:

The Office Action Summary, mailed 05 December 2005, having a shortened statutory period for response set to expire 05 January 2006, requires restriction to one of the following alleged patentably distinct inventions under 35 U.S.C. §121:

- I. Claims 6-9, drawn to a composition, classified in class 528, subclass 117;
- II. Claim 10, drawn to a curative, classified in class 252, subclass 182.25;
- III. Claims 11 and 13, drawn to a curing accelerator, classified in class 252, subclass 182.26;
- IV. Claims 12 and 14, drawn to a composition, classified in class 528, subclass 118;
- V. Claims 15 and 17, drawn to a method for curing an epoxy resin composition, classified in class 528, subclass 121; and
- VI. Claims 16 and 18, drawn to a method for curing an epoxy resin composition, classified in class 525, subclass 523.

Applicant traverses the requirement for the reasons stated hereinafter and respectfully requests withdrawal of the restriction requirement. Nevertheless, in accordance with the election requirement,

Applicant elects Group I, claims 6-9. Having elected this group, applicant further elects species from page 22 as follows:

Curative and curing accelerator: 2E4MZ

Host compound: TEP

Applicant notes that the statutory basis of restriction practice under Section 121, provides that if two or more independent and distinct inventions are claimed in one patent application, the Examiner may require the application be restricted to one invention. This authority is discretionary, not mandatory. Accordingly, Applicant respectfully requests that such discretionary authority not be invoked and the restriction requirement be withdrawn, especially in

light of fact that this application is in itself a divisional application and filing divisional applications is a costly endeavor.

Very respectfully,
